Silver \$5000	Pass
Gold \$1250	Pass
Gold \$1800	Pass
Gold \$2750	Pass
Platinum \$750	Pass

Cigna is providing this information as a courtesy to clients to be used for annual creditability requirements. The creditability test is based on the simplified determination approach as released by CMS on September 18, 2009 and assumes plans have no annual benefit maximum and a lifetime maximum of at least \$1M. For non integrated plans, the criteria only accounts for the average plan pay equivalence comparison and does not account for the other requirements within the approach. For integrated plans, high level medical assumptions are applied to determine actuarial equivalence between the plan's prescription drug coverage and the Medicare Part D-defined standard benefit, no other criteria is used. This determination is not sufficient for collection of retiree drug subsidy. Per CMS, the employer is ultimately responsible for determining the creditability of the plan, and may wish to engage an actuarial consulting firm to incorporate additional information to determine creditability. Incorporating a plan's actual experience may cause this guidance to differ. Therefore, this guidance is not to be interpreted as a formal actuarial attestation.

The creditability tests were calculated using the 2025 Medicare Part D defined standard benefit parameters and assumes Cigna is primary carrier in accordance with Medicare Secondary Payer rules. This determination may differ for Medicare-eligible retirees/former employees when Medicare Part A and B is the primary payer.
